DETAILED ACTION

1. Claims 16 and 17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6651810. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to one of ordinary skill in the art to set forth claim 1 without the combination with the fastener. Furthermore, it would have been obvious to one of ordinary skill in the art to provide the openings in the array of openings being uniformly spaced from one another to by a distance less than the size of an individual one of the openings to provide the desired spacing between the openings and to aim the fasteners easily.

2. Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear whether "a plurality of the openings" are the same as "a multiplicity of openings previously recited. This is a double inclusion.

3. Claim 16 is rejected under 35 U.S.C. 102(b) as being anticipated by any one of Mattox (5427230), or Carter (5363953), or LaCroix (D311458). Anyone of Mattox, Carter, or LaCroix teaches a device having a plurality of openings with the uniformly spaced from one another to by a distance less than the size of an individual one of the openings as claimed.
